HILTON NASA CLEARLAKE, HOUSTON, TX

TEXAS WING CONFERENCE

10-13 APRIL 2014

Fellow Texans, Volunteers and Friends,

We appreciate the hard work, dedication, sacrifice of time and resources ALL of our members make each and every day. The cooperative spirit in Texas Wing sets the stage for us to achieve our "Wing of Excellence" reputation. It is that time of the year to meet up with old friends and meet new friends at our Texas Wing Conference, 10-13 April 14, in Clear Lake, TX. We will celebrate a successful 2013 and learn new skills preparing for a busy 2014.

Please join us in honoring the many honorees for this year's top awards which will be presented at our conference banquet.

Congratulations to ALL of the annual award nominees! We are very proud of each of you and appreciate your special talents you share with Civil Air Patrol and the Texas Wing.

Brooks Cima, Colonel, CAP
TX Wing Commander

CONFERENCE UNIFORM OF THE DAY

General Conference

- USAF Style Service Dress
- USAF Style Long or Short Sleeve
- Blazer Shirt Combination
- Aviator Shirt Combination
- Navy Blue Polo Combination
- Civilian Business Casual

Saturday Banquet

- Mess Dress Uniform
- Semi-Formal Uniform
- USAF Style Service Dress
- Blazer Uniform
  Civilian Black Tie or Formal

No utility uniforms (BDUs, Blue Utility, Distinctive Blue Field Uniform, or Flight Suits) are authorized for wear during the conference activities. Utility uniforms during travel are authorized.

Note: The CAP Corporate Service Uniform is no longer authorized. See CAPM39-1

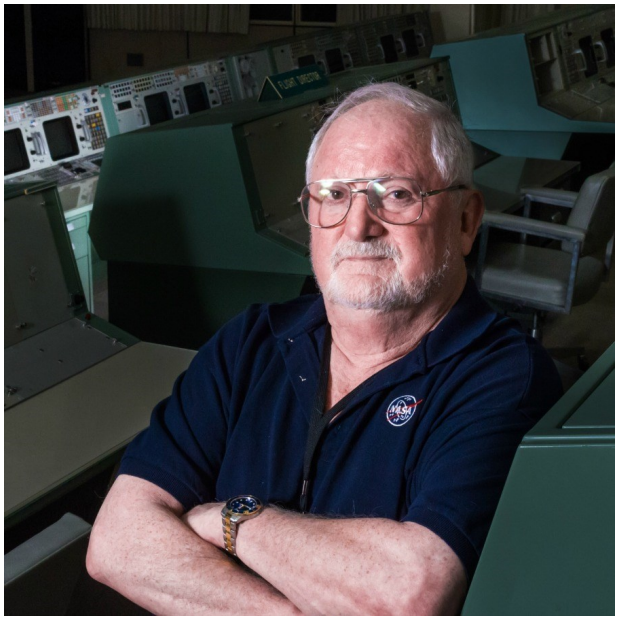
Awards Banquet Key Note Speaker



Who is Sy Liebergot? Sy Liebergot is a retired NASA Apollo Mission Flight Controller, retrospective space history lecturer and author who shares his remarkable personal life experiences. As a NASA EECOM (Electrical, Environmental and Consumables) Flight Controller in Mission Control, his professional engineering career spanned the entire Apollo Lunar Program, Skylab, the Apollo-Soyuz Test Project (ASTP) early Shuttle, and the International Space Station (ISS).

From his autobiography, Apollo EECOM: Journey Of A Lifetime: Sy's personal journey to the EECOM Flight Controller console in Mission Control began with a truly horrific childhood - one which he barely survived, whose remnants and after-images clearly influence his life to this day. The fact that he was able to endure, escape and overcome his terrifying origins provides the kind of compelling human drama that is all too often missing from these tales of derring-do. The heart and soul of his journey is a story of adversity confronted and gloriously defeated - of a man elevating himself through sheer stamina and determination from a background of poverty, deprivation and genuine terror to the loftiest possible heights of human achievement; participation in the great adventure to land humans on the Moon.

Some Highlights: Liebergot's Apollo space experience began with the very first launch of the unmanned AS-201 in 1966, a 38-minute ballistic "lob" down range. Even though his Apollo experience included the exciting missions of Apollo 8 and Apollo 11, Apollo 13 became an unwelcome highlight of his flight controller career.

The Apollo 13 oxygen tank exploded. The multiple failures that flashed across his Mission Control console screens seemed far too overwhelming to be anything but instrumentation failure, and Sy was the first to suggest as much. He was also the flight controller into whose lap had been dumped the catastrophe that was suddenly unfolding - that the spacecraft and its crew, now 200,000 miles from earth and hurtling in the wrong direction, had less than three hours of life left in their Command and Service Module spacecraft.

As EECOM in Mission Control on Apollo 13, Sy was at the focal point of the crisis when the spacecraft oxygen tank exploded. He has advised and contributed to several books concerning Apollo 13 including the movie, Apollo 13; and was the technical adviser for an archival multi-media CD-ROM entitled Apollo 13, A Race Against Time, which is devoted to the Apollo 13 mission. He has appeared in the PBS NOVA series, the History Channel Modern Marvels, and the acclaimed Public Broadcast System

documentary Apollo 13, To The Edge and Back. He served as the on-camera host for a space documentary entitled In the Shadow of the Moon, produced by the CBS affiliate in Austin, Texas. He has published his autobiography entitled Apollo EECOM: **Journey Of A Lifetime.**

Skylab: Skylab was the United States' first attempt at an orbiting space station. He served as an EGIL (pronounced "eagle"), the Skylab Program EECOM. Disaster seemed to follow Sy to the new spacecraft, when the unmanned Skylab 1 suffered a monster failure after its launch in 1973. The meteoroid shield that covered the Workshop was torn off, taking with it one of the two large solar panel wings, and fouling the other so that it could not deploy. Because the shield doubled as thermal insulation, once on orbit, Skylab found itself hot and underpowered--it was almost a total loss. Once again, the resourcefulness and ingenuity of ground personnel saved the spacecraft.

ASTP: The Apollo-Soyuz Test Project (ASTP) was the first international space flight. It was a symbol of the new spirit of 'détente' between the two superpowers and a pre-cursor of Russian-American cooperation on the ISS. The mission involved a linkup between an American Apollo CSM and a Russian Soyuz spacecraft. Liebergot was assigned as the Lead EECOM in 1974 and took on the challenge of exciting new experiences both technically and culturally.

(As a side note, and somewhat humorously, he was apprehensive about the trip to the USSR, because of his Russian heritage and his ignorance about what the KGB might know of his family. Sy's paternal grandparents emigrated from Kiev in the Ukraine in 1900, and his father was their first born in the U.S. in 1910. His maternal grandparents emigrated from Novosibkov, Russia in 1913, together with his 4-year old mother.)

Post Flight Controller and Early Space Station Years in 1979, Liebergot, along with 40 other engineers met in a small building in a back part of the Johnson Space Center (JSC) campus, to write a program plan for a space station. Sy was able to apply his hard-earned operations knowledge at the inception of a new program.

A Space Station Program Office was created at JSC in 1981, and Sy had a position as a senior engineer. Life was good; everyday tested his imagination and manned flight operations experience. 1986 found the space station program taken away from JSC and inexplicably moved to Reston, Virginia, in the vicinity of Washington, D.C. Disappointed, Sy retired from NASA and took a Shuttle engineering position with Rockwell.

(The new space station was named "Freedom." The program offices were staffed by hundreds of personnel in Reston for eight years, consumed eight billion dollars, and yet produced no hardware. In 1995, it was moved back to JSC.)

Working on the ISS: Life takes odd turns. Sy was hired by a small engineering company and again found himself working in Mission Control, this time on the engineering side of the program which was most responsible for the ISS construction. This valuable experience led to becoming a Senior Project Engineer, by which he directed the design and fabrication of the astronaut neutral buoyancy trainers for the International Space Station (ISS).

Awards: As part of the heroic Apollo 13 operations team, Sy was awarded the Presidential Medal of Freedom. He has also received the NASA Commendation Award for his leadership role in the Apollo-Soyuz Test Project (ASTP) international space mission. He has been honored as Distinguished Alumnus of his alma mater's School of Engineering and Technology.

He remains an active booster and international public speaker of NASA's space accomplishments and the importance of a good education. He lives in Pearland, Texas with his wife, Craig.

Morning General Session Speakers

Technical Sergeant Keith D. Aussant

Technical Sergeant Aussant is a member of the 342nd Training Squadron, Lackland AFB, Texas. He is part of the squadron's Pararescue and Combat Rescue Officer Indoctrination Course.

Technical Sergeant Aussant grew up in Dighton, Massachusetts. Along with his desire to serve his country, he was taught at a young age to respect and admire the military. This harnessed his decision to enlist in the United States Air Force. He entered the USAF in 2004 and started his career as a Pararescueman at Moody AFB, Georgia. Technical Sergeant Aussant has deployed to OEF, OIF and HOA. Technical Sergeant Aussant has served as an Instructor Supervisor for the duration of his tenure at the 342nd training Squadron. He directly supervises over six hundred students annually and has shaped future Airmen and Pararescuemen.

Technical Sergeant Joshua A. Andrada

Technical Sergeant Joshua Andrada is an Instructor at the Pararescue Indoctrination Course, Lackland AFB, TX. As an instructor he is responsible for effective course content delivery to 600 trainees annually. His additional duty as the 342 TRS Unit Deployment Manager entails overseeing all deployment related issues for 544 Airmen across six geographically separated units.

He has deployed four times in support of Operation Enduring Freedom as a Pararescue team member, element leader and team leader from 2006-2010. He has three times supported NASA space shuttle missions, twice at trans-oceanic abort landing sites in Europe and once at the Kennedy Space Center in Florida from 2006-2010. Additionally, he was one of two Pararescuemen to provided two weeks of rescue support for former President George W. Bush in 2007. A native of Arizona, Technical Sergeant Andrada began his Air Force career with enlistment into the Air Force in 2003 and completed the arduous Pararescue pipeline in 2006.

Lunch General Session Speaker

James Hannibal, Author & Former USAF Stealth Bomber Pilot

James graduated from the Air Force Academy where he focused on Islamic Terrorism and earned his degree in Middle Eastern Studies. During his Air Force career he has flown the A-10 Warthog, the MQ-1 Predator, and the top secret B-2 Stealth Bomber. He has been shot at, locked up with surface to air missiles (not in the Stealth) and aided the capture of High Value Targets. He is the author of the Nick Baron covert operations series from Penguin Random House.

EXHIBITORS

Special Events

FRIDAY EVENING RECEPTION 11 Apr 14

Join us Friday evening for a special reception hosted by our Wing Commander, Col Brooks Cima!

Seniors - Beginning at 1900, join us outside by the pool for an evening of fellowship (and quite possibly a few war stories). Hors d'oeuvres will be served with an open cash bar.

Cadets - Beginning at 1900, please join your fellow cadets in Discovery for a military ball of your own. DT Entertainment will be on site mixing tunes for your enjoyment! Dress is semi formal to formal.

NASA MISSION CONTROL TOUR & NASA 0800-1130 12 Apr 14

First thing Saturday morning, a bus will be leaving from the hotel to **meet Gene Kranz for a private tour of NASA's Historic Mission Control**. This is primarily geared toward our Cadets, but Seniors are welcome as well!

Gene Kranz is a retired NSAS Flight Director and manager. He served as a Flight Director during the Gemini and Apollo Programs. He is best known for his role in directing the successful Mission Control team efforts to save the crew of Apollo 13. Gene is noted for his trademark close-cut flattop hairstyle and wearing dapper white "mission" vests made by his wife Marta Kranz.

Free time to tour Johnson Space Center will take place after the special guided tour by Mr. Kranz.

MORNING GENERAL SESSION 0800-1000 12 Apr 14

Promptly join us in the Atlantis Ballroom at 0800 hours to kick start the 2014 Wing Conference into High gear. Meet many fellow CAP Members from across the wing and hear amazing stories from **USAF Pararescue Instructors TSgt Joshua Andrada & TSgt Keith Aussant.**

Para-rescuemen, also called PJs, are United States Air Force Special Operations Command (AFSOC) and Air Combat Command (ACC) operatives tasked with recovery and medical treatment of personnel in humanitarian and combat environments. They are the only members of the DoD specifically organized, trained and equipped to conduct personnel recovery operations in hostile or denied areas as a primary mission.

LUNCH & AWARDS PRESENTATION 1200-1300 12 Apr 14

Return to the Atlantis Ballroom at 1200 for a refreshing lunch break, awards, and a special presentation by James Hannibal, author and pilot.

WING AWARDS BANQUET 1900-2200 12 Apr 14

Pre-Banquet Cocktail hour will begin at 1730 in the Atlantis Ballroom Foyer with a cash bar. The doors for the Ballroom will open at 1830, with posting of the colors at 1905. A delectable dinner will be served followed by the anticipated presentation from Sy Liebergot, ECCOM for Apollo missions.

At the conclusion, we will take a short break and then promptly being the Texas Wing Annual Awards.

COMMANDER'S CALL 0800 13 Apr 14

If you are a member of the Texas Wing Staff, your presence is requested by Col Cima for her Quarterly Face-to-Face Commander's Call meeting in the Atlantis Ballroom 1.

NON-DENOMINATIONAL WORSHIP SERVICE 0700 13 Apr 14

The worship service will take place in the Gemini Room on the bottom floor of the hotel.

CATHOLIC WORSHIP SERVICE 13 Apr 14

The worship service will take place in the Apollo Room on the bottom floor of the hotel.

Featured Breakout Sessions

These are just some of the outstanding sessions and presenters we have lined up. Please pick up an updated copy of the Conference Schedule for times and locations.

Who is Rowan & Where is Garcia?

Presented by Col Frank Buethe, SWR CC

CAP Core Values and how they can be integrated into CAP missions/careers/and our personal lives

History in a Technology World

Presented by Maj Phil Kost, TxWg Historian

Calling all historians....or history buffs...or those who have ever read a history book! The amount of information at our fingertips today as historians is amazing. Come to this breakout session to learn and exchange different ideas in research techniques, learn a little about CAP History, and the future of the Historian PD.

PAO: Take Social Media to the Next Level & What you should know to Embrace it!

Presented by Maj Johanna Augustine, TxWg Deputy Director of Public Affairs

What social media can do for you or what every commander and PAO should know about social media. Facebook, Twitter, LinkedIn, Google +, Instagram. Don't fear the medium, embrace it! Learn the ins and outs of social media with emphasis on Facebook to include setting up a squadron or group page, posting articles and pictures, sharing posts, security, and OPSEC.

2013 Overview of Accidents in the Houston District

Presented by Lance Little & Paul Down, FAASTeam

Recap the 2013 Houston Area Accidents with members of the FAA Safety Team.

Maximizing Your Chaplaincy

Presented by Lt Col Dale Climie, TxWg Chaplain

You're a member of the world's largest volunteer chaplain corps. You have met the highest educational requirements for any position within CAP. And you facilitate a Character Development forum once a month?! What's up with that? In this session, we will share ways of using our credentials as chaplains to open new opportunities to "let our light so shine".

Cadet Flight Instruction: PFA / GFA

Presented by Lt Col Bob McDonnell, SWR DOV

The breakout session is both for Senior members that are interested in giving flight instruction to cadets and for cadets interested in receiving flight instruction. We will cover both powered and glider. For the Glider I will be assisted by LTC Tom Bishop, the long time manager of the Wing Glider Program. We will cover both opportunities at Organized Flight Academies and local init instruction. We will also try to give local IPs the tools to help them in conducting local instruction in their CAP Unit.

Inspections 101: Understanding Compliance Inspections

Presented by Lt Col George Shank, SWR IG & Lt Col Al Bryant, TxWg IG

The presentation is about recent changes made by National concerning Wing Compliance Inspections. Afterwards, there will be a discussion with Wing members as how these changes will affect Groups and Units within the Wing.

...And Many More!!!
